INTEGRATING THE DIMENSIONS OF BIODIVERSITY FOR GLOBAL-SCALE INFERENCE

Thanks to increasing availability of environmental data as well as genetic, phenotypic and spatial biodiversity information outstanding opportunities now exist for integrative biodiversity science at a global scale. In my seminar I will present new conceptual and methodological advances that spur progress in this still emerging field. I will demonstrate specific empirical examples, both basic and applied, from work on vertebrates in our research group.

at Edifício C6 - Faculdade de Ciências da Universidade
de Lisboa - Campo Grande - LISBOA - room 6.1.36 – 12 a.m.
