EIT Health – status update

InnoStars all Partner call

October 2017
Application possibilities in Innovation, Education & Business Creation
Innovation Project Types

Innovation by Ideas
- Address challenges within EIT Health’s scope
- ‘Bottom-up’ / solution driven

Wild Card Projects
Develop, test and validate ‘out of the box’ solutions to healthcare challenges

Innovation by Design
- Collaborative projects that are “needs-driven” and start from a recognised market need or societal problem
- Developing products and services hindered by specific innovation barriers
Innovation Projects Instruments Overview

**Innovation by Design**
Projects that address recognised health and healthcare needs.

**Innovation by Ideas**
Projects that are solution-driven, developing innovations that target EIT Health’s challenges.

**Wild Card**
Have extraordinary impact on a specific healthcare challenge.

*where risk is the likelihood of not achieving the research objective.

The chart illustrates comparative, risk, potential impact and portfolio share of different types of Innovation Projects.
Innovation Projects – main changes

Innovation by Design

• New subcall under focus areas
• More integrated portfolio and impact oriented
• 4 thematic areas kept: integrated care for chronic diseases, workplace interventions, homecare/care home, early prevention
• Moving from thematic areas to focus areas
• Alignment with Accelerator and Campus
• Ideation process included in preparation phase

Innovation by Ideas

• 2 calls per year: by April and by September
• Work Package 0 – Validation (12 months) - Valorization (6 months)

Wildcards

• Submit your challenge or idea
• Send your individuals to the tournament
• Apply as incubator/accelerator to host the team
• Organize tournament
